

Waterproofing and protective coatings to suit any project (National Building News)

Australian Urethane Systems (AUS) is fast becoming the waterproofing and protective coatings supplier of choice for a number of major builders, mining companies and project managers in Australia and New Zealand.

The company provides a complete range of the latest technologies in polyurea and polyurethane coatings.

"With our strong research and development we aim to provide the highest quality products, coatings, solutions, services and support to our most valuable asset - our customers," said AUS sales manager Matthew Slatyer.

AUS has a team of experienced urethane professionals in polyurethane systems, additives and machinery. This experience includes development of systems for a wide range of applications, hands-on operation and servicing of polyurethane and polyurea dispensing equipment.

Its range include pure Polyurea, modified Polyurea, Polyurethane coatings polyaspartics, hardcoats, approved primers, and Graco dispensing equipment.

"AUS can work with clients from the specifying stage through to the completion stage, providing builders with waterproofing membranes, corrosion and wear resistant coatings," said Mr Slatyer.

AUS has been a supplier for some of Australia's most well known residential and commercial construction projects including the supply of waterproofing membranes for One National Circuit- the Prime Minister's new Cabinet buildings.

It is currently working on the new ATO building in Canberra

AUS works closely with a number of approved applicators throughout Australia and New Zealand to ensure the customers' waterproofing requirements are met.
